PROFESSIONAL SUMMARY

Cybersecurity student at Iona University pursuing roles in SOC analysis, penetration testing, security engineering, and IT support. Holds industry certifications including Cisco Certified in Cybersecurity (CC) and ISC2 Candidate status, with hands-on experience in vulnerability assessment, network security, blue team analysis, and cloud infrastructure. Built and deployed multiple production-grade security tools independently, applying NIST frameworks, MITRE ATT&CK, and secure development practices. Proficient across Python, Bash, PowerShell, AWS, GCP, Docker, and Kali Linux environments.

EDUCATION

Iona University New Rochelle, NY
Bachelor of Science, Cybersecurity, Security Threat and Analysis. Merit Scholarship: \$23,000 |
Alumni Award: \$1,000 | Gael Service Award: \$1,000 | Spirit and Performing Arts Award. May 2030
Relevant Coursework: Network Security, Threat Analysis, Operating Systems, Computer Architecture, Calculus for Computing

EXPERIENCE

Associate, Sales Floor and Customer Service Nov 2024 – Jan 2025
Kohl's Wappingers Falls, NY

- Processed 100+ daily customer transactions with accuracy across POS systems while maintaining department organization under high-volume retail conditions
- Recognized by shift managers for reliability and composure during peak-season rush; consistently assigned to highest-traffic floor sections

Water Park Staff, Guest Safety and Operations May 2023 – Sep 2023
Splashdown Beach Fishkill, NY

- Monitored guest safety across high-volume attractions, enforcing protocols for a facility serving thousands of daily visitors
- Collaborated with a team of 30+ staff to coordinate operations, manage peak-hour queues, and de-escalate guest incidents without supervisor intervention

PROJECTS

VaultForge, Secure Password Manager (local) 2025

- Built a fully local, offline password manager using AES-256-CBC encryption with no cloud storage or third-party dependencies
- Implemented NIST SP 800-63B password entropy scoring, HIBP k-anonymity API integration for breach detection, and secure clipboard clearing
- Designed modular Python architecture with AES and XOR cipher modes, HMAC integrity verification, and sandboxed file operations
- Stack: Python 3.11, cryptography library, argparse CLI

CivicPulse, Open Government Data Dashboard 2025

- Designed and deployed a full-stack web application consuming the U.S. Census Bureau ACS 5-Year API, serving live population and income data for all 50 states
- Implemented asynchronous data ingestion via httpx with a TTL-based in-memory cache layer eliminating redundant API calls without Redis
- Built CI/CD pipeline on GitLab with SAST analysis and secret-detection enforcement on every merge, treating security as a first-class requirement
- Stack: FastAPI, Uvicorn, Docker, GitLab CI/CD, Chart.js, Jinja2; WCAG 2.1 compliant (ARIA live regions, skip-navigation links)

LicenseLoop, License Renewal Automation Platform 2025

- Developed a SaaS platform tracking business license expirations and triggering automated email alerts at 30, 7, and 1 day before renewal deadlines
- Implemented user authentication, tiered subscription plans (free/pro), and Stripe billing integration with cron-secured endpoint access control
- Containerized the full stack with Docker and deployed with production-grade configuration; zero manual intervention required after deployment
- Stack: FastAPI, SQLAlchemy, Docker, Stripe API, Python 3.11

Personal Portfolio, Terminal-Themed Cybersecurity Site sergrdz.pages.dev 2024 – 2025

- Designed and deployed a multi-page portfolio featuring a custom ASCII boot sequence, CTF writeups with working Python PoC code, and live-hosted project demos

- Deployed to Cloudflare's global edge network via Cloudflare Pages: zero cold start, 99.9% uptime
- Stack: HTML, CSS, Vanilla JS, deployed with Cloudflare Pages; live at sergrdz.pages.dev

CERTIFICATIONS

- Cisco Certified in Cybersecurity (CC)
- ISC2 Candidate, Associate of ISC2
- Blue Team Junior Analyst, Centri Security
- Penetration Testing, Centri Security
- OSINT Fundamentals, Centri Security
- Python Programming, Centri Security
- Dark Web Operations, Centri Security
- PowerShell for Security, Centri Security
- Anthropic: Building with the Claude API
- Anthropic: Claude Platform 101
- Anthropic: AI Fluency Framework and Foundations
- Anthropic: Introduction to Model Context Protocol
- Anthropic: Claude in Amazon Bedrock
- Anthropic: Claude with Google Cloud Vertex AI
- Anthropic: Claude Code 101

AWARDS & HONORS

- 1st Place, North American Bagpiping Competition, Youth Division (August 2025): competed against regional champions across the US and Canada
- 8th Place, World Bagpiping Championship, Youth Division (August 2024): one of fewer than 30 youth competitors to qualify internationally
- Recipient of seven competitive bagpipe scholarships (2023-2026): St. Andrew's Society of Schenectady, Invermark School of Piping and Drumming, Balmoral School of Pipes and Drums, Glasgowlands Foundation, and two summer program scholarships to British Columbia
- Recommended for Monmouth College's highest bagpipe scholarship (\$5,000 annual award): among fewer than five recipients nationally
- Iona University Spirit and Performing Arts Award recipient | Bill Millin Scholarship aspirant track
- Active competitive member, Capital Youth District Pipe Band (Albany, NY): regional and international performance record since 2019

SKILLS

Security: Penetration Testing, Vulnerability Assessment, OSINT, SIEM Operations, Blue Team Analysis, MITRE ATT&CK, NIST SP 800-53, Threat Modeling, Dark Web Monitoring

Tools: Nmap, Burp Suite, Wireshark, HackTheBox, Splunk, Kali Linux toolset, Git, VS Code

Programming: Python 3.11, Bash, PowerShell, JavaScript, REST API development, automation scripting, CLI tooling

Cloud and Infrastructure: AWS, Google Cloud Platform (GCP), Docker, GitLab CI/CD (SAST, secret detection), Cloudflare Pages, Linux (Ubuntu, Kali)

Web and Data: FastAPI, Uvicorn, SQLAlchemy, Stripe, Jinja2, Chart.js, BeautifulSoup, Playwright, WCAG 2.1 accessibility compliance

AI and APIs: Anthropic Claude API, Amazon Bedrock, Google Vertex AI, Model Context Protocol (MCP), Generative AI integration

VOLUNTEER EXPERIENCE

- Food Service Volunteer, Dutchess Outreach Lunchbox Program, Poughkeepsie, NY (Summer 2024): Prepared and distributed meals to underserved community members; 10+ hours of direct service during county volunteer week
- Medical Equipment Assistant, Loan Closet, Poughkeepsie Reformed Church, Poughkeepsie, NY (Summer 2024): Assisted elderly and mobility-impaired clients with borrowing, fitting, and returning medical equipment including canes, walkers, and wheelchairs
